TPA AIRSIDE D PROJECT INFORMATION

TPA's Airside D project is part of the Airport's Capital Program and is the third and final phase of TPA's Master Plan project. The Master Plan is an FAA-required blueprint for development aimed at decongesting airport facilities and enabling future growth. The new terminal will enable the Airport to serve an additional 13 million passengers by 2037 via 16 gates, totaling 72, and serving both domestic and international flights. The building will be about 563,000 square feet with vast concessions space, an outdoor terrace, state-of-the-art Customs and security facilities, as well as new screening, gate check-in, and bag processing technologies. As the first new terminal in more than 17 years, this will be the fifth in total and the project will be paid for with a mix of federal and state grants and airport-issued bonds. Construction is expected to start in 2024 and be completed in 2027.

PHASES 1 AND 2 INCLUDE SEVERAL SIGNIFICANT PROJECTS :

- The Main Terminal Redevelopment
- The Rental Car Center
- SkyConnect Automated People Mover
- Roadway Expansion
- Central Utility Plant
- Award-winning Blue Express Curbsides for Passengers Without Checked Luggage
- New SkyCenter One Office Building

**WEITZ.COM****@THEWEITZCOMPANY**

Founded in 1855, The Weitz Company is the oldest commercial general contractor founded west of the Mississippi River and annually ranks in the top tier in the Engineering News-Record magazine's list of Top 400 Contractors.

As a full-service construction company, general contractor, design-builder and construction manager, Weitz has built projects in all 50 states in the core product lines of commercial, industrial, and international.
